

Sampling Form MRD 2

This form is essential for transport of the samples without any delay. It is commonly known as the shipping document or the (air)way bill.

Commonly this document is specific for each courier. Currently many of the courier companies will have website based Forms that are printed by the courier.

During transport, the product is accompanied with this Form 2 stating:

1. Date (and time) of sending
2. Collection address of the center that sends the package, with the data of the contact person
3. Receiver/Delivery address of the recipient referral laboratory, with the data of the contact person

The samples are **not** classified as dangerous goods.

Make sure to write in the description field: Biological Substance, Category B, UN3373

General Description <small>Please put full details on commercial invoice</small>	Number of items	Weight		Dimensions		
		Kilos	Grams	Length	Width	Height
Item No.	Total			<small>Equipment subject to laboratory assessment Please refer to our website or call Customer Service</small>		

The weight is commonly 100 grams and the dimensions: Length 20, Width 10 and Height 3.

It is crucial for the quality of the sample that the package is kept on room temperature. This can be filled in as "Ambient" in the *Special Delivery Instructions*.

9. Special Delivery Instructions (Reserved for your instructions (if required))

It is best to prepare the package for pick up before 15.00 hr, which will largely reduce the costs of the express sending.
